The Deputy Commissioner,
Bangalore District

Sir,

I have the honor to convey
the following observations and
instructions regarding the Shannam
- bhudhi feeder within city limits
of Bangalore.

The rear slope of the bund
of this feeder channel had been
seriously encroached upon for culti-
vation and house building and
parts of the bund itself had been
allowed to be cut down by house
builders. This cutting down was
very patent on either side of the
Subedar Chattram road and had,
on the west side lowered the

ground several feet below the level of the channel. The land was in several places overgrown with Lantana and other noxious vegetation and in other places had greatly worn down by the passage of cattle, washermen's donkeys &c. The land should be maintained as a riding path, but as much land as may be required for a possible driving road in the future should be reserved and demarcated and enclosed by a suitable live fence during the early rains.

A portion of the above work was done by Mr. Purnanjan, when Deputy Commissioner, in consultation with the Executive Engineer Mr. Srinivasa Rao. But as he had to leave the District before completing the work, I am to request that you will be so good as to continue the work so begun to a satisfactory completion as early as possible.

The whole of the work should
be treated as a miscellaneous public
improvement, for which a moderate
lump sum will be granted
from Provincial funds upon
application, as it is believed that
the municipal Board is not
likely to be able to provide the
funds required or the whole of what
is required. I have the

The Dharmambudhi feeder within city
limits of Bangalore.

J. H. S.
-96.

The rear slope of the bund of this
feeder channel had been seriously en-
croached upon for cultivation and
house building and parts of the bund
itself had been allowed to be cut
down by house builders. This cutting
down was very clear on either side of
the Subedar Chattram road and on
the west side this cutting down had
lowered the ground several feet below
the bed of the channel. The bund was
in several places over grown with
Lantana and other noxious vegetation, and
in other places had greatly worn down
by the passage of cattle, washermen's
donkeys &c.

Mr. Purnagya when Deputy Commissioner
had been instructed to remedy these
evils and had taken the necessary
action, but has had to leave the

District before completing the work. Mr. Karasimnagar should now give his special attention to it.

It is proposed to maintain the bund as a riding path, but as much land as may be required for a possible driving road in the future should be reserved and demarcated and enclosed by a suitable line fence. Much of this work had also been done during Mr. Purnaiyya's time in consultation with the Executive Engineer Mr. Sreenassa Rao. Mr. Karasimnagar should be requested to continue the work thus begun to a satisfactory completion as early as possible. The line fence should be put down during the early rains.

The whole of the work should be treated as miscellaneous public improvement for which a moderate lump sum will be granted upon application, as it is believed that municipality is not likely to be able to provide

the funds required on the whole of

No. 147.

City Municipal Office

Bangalore dated 11 June 1896

Through the Revenue and General Secretary.

From

The President, Municipal Commission,
Bangalore City.

To

The Executive Engineer,
Bangalore Water Supply Division,
Military Works.

Sir,

Referring to your No. 405 dated 4th June 1896, I have the honour to observe that the Contractor's coolies have squatted on a land to the South East of Guttahally village, in proximity to the main feeder of the Dharmambudhi Tank. There are 13 huts, sheltering about 60 souls, adults and children. The people are most filthy in their habits and surroundings. On two visits of mine I found that not only were the localities

localities adjacent to the coolies' huts & littered with human excreta and droppings of pigs but the feeder itself was also made use of for purposes of nature, I having detected two men on one occasion in the act of soiling the channel.

2. The objection to the coolies being huddled in their present location might be obviated if the Contractor would, at once, run up temporary latrines and place a watchman in charge to prevent the coolies and children committing nuisance about. On the other hand I will make proper arrangements for the daily conservancy of the temporary latrines during the period the coolies are located near Guttahally.

I have the honour to be,

Sir,
Your most obedient servant,

Sd/ J J Leonard

President

To

THE FIRST ASSISTANT TO THE

RESIDENT IN MYSORE.

SIR,

I am directed to forward for transmission to the Executive Engineer, Bangalore Water Supply Division, Military Works, a letter from the President of the Bangalore City Municipality, of 11-6-96 No. 147, objecting to the coolies of the water works contractor being huddled on the land to the South East of Guttahalli on the ground of their fouling the main feeder of the Dharmambudi feeder, and suggesting measures for obviating the nuisance.
